

Wegmans Food Markets, Inc.

POTTSVILLE, PA

VALUE DELIVERED

Food Tech was selected to help locate, design, and construct a new distribution center. Our facility sizing decisions, based on pick and reserve slot requirements, helped optimize the flow of labor and materials.

Additionally, our highly-efficient ammonia refrigeration system solution enabled precise control over multiple temperature and humidity zones facility-wide.

CLIENT OBJECTIVES

To help expand their network of retail and distribution facilities in the Mid-Atlantic region, Wegmans needed site selection and design-build services.

SOLUTIONS

Our team of logistics engineers helped Wegmans determine the ideal location near Harrisburg, PA.

We chose a 100-acre tract in Pottsville and performed master site planning to develop a strategy for the new distribution center.

The completed 125,000-square-foot facility features cutting-edge industrial engineering and advanced material handling design. Our solutions for this project included:

- Pressurized banana ripening rooms
- Double-sided docks for shipping and receiving
- 5,000-square-foot security building
- 20,000-square-foot employee amenity building with overhead bridges to warehouse and docks
- Cold storage construction featuring an ammonia refrigeration central system

CLIENT BACKGROUND

Founded in 1916, Wegmans is a regional supermarket chain with over 100 stores.
