

Designing, Planning, and Building Innovative Food Process Facilities

SPECIALIZED INDUSTRY EXPERTISE

Grocery distribution

Food service distribution

Cold storage and freezer warehouses

Dairy process plants

USDA meat processing plants

Frozen food processing plants

Fresh ready-to-eat food
processing plants

Food Tech specializes in the planning, engineering, and construction of food processing plants, cold storage warehouses, and distribution facilities. Using the design-build project delivery approach, we provide these core capabilities across dairy, fresh and frozen food, USDA meat plants, and cold storage facilities.

With our extensive experience in the food processing industry, we understand the unique operational needs of these facilities, helping us provide innovative, cost-effective, and energy efficient solutions.

Comprehensive Facility Planning and Management

We provide clear, upfront facility planning and feasibility studies for your projects, whether they be greenfield or expansion. We'll ask questions about your current and future needs, expected lifespan, site utilization, ROI, and more to help find ways to increase productivity and lower costs.

Our facility planning solutions include:

- > Feasibility studies
- > Facility sizing
- > Process programming
- > Site selection
- > Master planning
- > Preliminary design
- > Construction estimating
- > Scheduling

Innovative, In-House Design-Build Services

Food Tech uses a design-build approach to bring your project from planning through to construction and the opening of your facility. We create detailed architectural and engineering plans and submit them for building permits to help expedite the permitting process.

We also solicit multiple competitive bids at the subcontractor and supplier levels. Our construction personnel then coordinate and administer the fieldwork, staying on the project through commissioning, qualification, and verification.

Our design-build capabilities include:

- > Architecture
- > Engineering
- > Preconstruction
- > Permitting
- > Construction management

Unmatched Food Facility Expertise

We have the industry expertise needed to streamline and expedite even the most complex food facility projects, helping you stay on time and on budget. You'll find that when you work with us, you get consistent, clear communication that builds trust.

100-Percent Objective

We don't self-perform any construction work or represent specific vendors. This empowers us to make the best material and system recommendations for your unique facility without bias or allegiance to predetermined contractors or manufacturers.

Harnessing the Power of a Fortune 500® Leader

As a subsidiary of EMCOR Group, Inc. (NYSE: EME), we have the financial backing and support of a Fortune 500 leader in mechanical and electrical construction, industrial and energy infrastructure, and building services.

Combining the strength of an industry leader with the knowledge and care of over 400 locations, the 46,000+ skilled employees of EMCOR have completed some of the country's most ambitious projects.

OUR ADVANTAGE:

Custom solutions based on industry specialization

Proven track record

Access to advanced technologies from in-house engineers

Ability to lower risk and increase ROI through single-source project management

Industry-leading safety program

Competitive bidding and lower mark-ups to help reduce costs

Process/controls installation, commissioning, qualification, and validation for smooth startup
